

## Year 6

### 2D Shapes Worksheet 2

Questions 1-6: What am I? Use the clues to name each quadrilateral. Questions 7-10: name each triangle.

**Question 1**

I have 4 equal sides but no right angles. What am I?

Answer: \_\_\_\_\_

Working space

**Question 2**

I have 4 lines of symmetry and 4 sides. What am I?

Answer: \_\_\_\_\_

Working space

**Question 3**

I have 2 lines of symmetry and my diagonals are equal. What am I?

Answer: \_\_\_\_\_

Working space

**Question 4**

I have no lines of symmetry, but I have 2 pairs of parallel sides. What am I?

Answer: \_\_\_\_\_

Working space

**Question 5**

I have no lines of symmetry, but I have 1 pair of parallel sides. What am I?

Answer: \_\_\_\_\_

Working space

**Question 6**

I have 2 pairs of equal angles and 2 pairs of equal sides. What am I?

Answer: \_\_\_\_\_

Working space

**Question 7**

What type of triangle is this? (Name its angle type AND its side type.)

Answer: \_\_\_\_\_

Working space

**Question 8**

What type of triangle is this? (Name its angle type AND its side type.)

Answer: \_\_\_\_\_

Working space

## Year 6

### 2D Shapes Worksheet 2

**Question 9**

What type of triangle is this? (Name its angle type AND its side type.)

Answer: \_\_\_\_\_

*Working space*

**Question 10**

What type of triangle is this? (Name its angle type AND its side type.)

Answer: \_\_\_\_\_

*Working space*
